Source: Pennsylvania Department of Education.

Note: State Total is all public school enrollees and graduates, including charter schools, technical schools and students served in intermediate units and state facilities.

Technical and Charter schools serving multiple school districts are listed at the beginning of the county schools. Those associated with a single district are listed under that district.

Total enrollment and graduate figures are duplicated in each county where the entity serves school districts in more than one county.

Graduation Gap is computed by subtracting the difference between the number of ninth grade enrollees from the number of graduates and dividing by the 9th grade enrollment number.

The PDE Graduation Rate is calculated by subtracting the number of students who drop out of school in grades 9 through 12 (based on the local school district's definition of a dropout) from enrollments.

* No ninth grade enrollments are reported.

** No graduates are reported.
