### Living Arrangements and Housing

#### The impact of family

On this page: Children's living arrangements with parents and grandparents, and family housing circumstances

- Children in single-parent households are likelier to live in poverty, have fewer relationships with male role models, have less time to interact with working parents, and have lower academic standing.
- Grandparents raising their grandchildren often need help – such as child care, support groups, and physical and mental health services – managing their responsibilities and maintaining a stable home environment.
- Low-income families are likelier to rent their homes, missing the financial benefits of home ownership. Children of renters are likelier to experience destabilization caused by high housing costs, overcrowding, and poor conditions.
