Post #4: Facebook - How to #CountAllKids in the right place

#Census2020 If you have children in your home, make sure they are counted in the right place. Here are some useful tips to **#CountAllKids** in the right place:

If a child's time is divided between more than one home, count them where they stay most often. If their time is evenly divided, or you don't know where they stay most often, count them where they are staying on Census Day – April 1, 2020.

If a child's family (or guardian) is moving during March or April 2020, count them at the address where they are living on April 1, 2020.

Count children in your home if they don't have a permanent place to live and are staying in your home on April 1, 2020, even if they are only staying with you temporarily.

Count newborn babies at the home where they will live and sleep most of the time, even if they are still in the hospital on April 1, 2020.
