

CHILD PROTECTIVE SERVICES (CPS)

Child maltreatment is a serious problem that has grave and costly consequences for the child, his or her family and the community at-large. A child who has experienced abuse and neglect is more likely to have social, emotional and physical health problems and perform poorly in school.

GENERAL PROTECTIVE SERVICES (GPS)

Reports not alleging abuse of a child are categorized as general protective services (GPS) reports. Addressing concerns related to child safety and well-being before allegations of child abuse or severe neglect are made enables children to remain safely in their own homes while services are provided to the family to mitigate the risk of potential maltreatment.

FOSTER CARE - SERVED

Foster care is meant to be a temporary intervention to assure the safety and well-being of a child. A child who spends long periods in foster care is more likely than other children to drop out of school, have mental health challenges, and experience unemployment and/or homeless as an adult. The following shows the past five years of data regarding children served in foster care during each federal fiscal year.

FOSTER CARE - RE-ENTRIES

Data on re-entries provides information on children who come back into foster care because of new or continuing challenges at home. Some children experience numerous foster care episodes or cycle in and out of the system. Others can experience large spans of time between foster care episodes, which is why the age of children who re-enter is typically older.

FOSTER CARE - GOALS

All children in foster care have a court-ordered permanency goal, which directs the efforts of the child welfare agency toward a certain family outcome for each child. In addition to the court-ordered 'primary' goal, a 'concurrent' goal is put in place to ensure permanency is achieved if for some reason the primary goal cannot be met. This data provides information on the most recent primary goal for every child served in foster care during the federal fiscal year.

FOSTER CARE - REMAINING IN CARE

Data on children remaining in foster care provides information on children who did not leave foster care during the year but are still in foster care on the last day of the federal fiscal year. This data includes all children in foster care on September 30. Some of these children may have just entered foster care days prior to the end of the fiscal year and others may have been in foster care for many years.

FOSTER CARE - STABILITY

Every time a child moves, the trauma caused by separation and lack of continuity grows. A child who faces multiple placements struggles to build and maintain healthy relationships and confront academic challenges due to school changes.

Indicator

Foster Care Placement Stability

Children who were in foster care for 12 to 23 months and had three or more placement settings.

2016			2017			2018			2019			2020			County % Change 2016 to 2020

FOSTER CARE - TIMELY REUNIFICATION

A child's separation from his or her parents or relatives is traumatic for all involved. Minimizing the time a child spends in foster care without compromising safety is key to healthy child development.

Indicator

Timely Reunification with Parents or Relatives

Children who entered foster care for the first time who were reunified with their parents or discharged to relatives within the next 12 months.

2016			2017			2018			2019			2020			County % Change 2016 to 2020

FOSTER CARE - FAILED REUNIFICATION

A child re-entering foster care following a return to his or her family signals a breakdown in the family and a potential failure on the part of the child welfare system to appropriately address family needs.

Indicator

Failed 1-Year Reunification (Re-entry)

Children who re-entered foster care in fewer than 12 months following reunification with parents or relatives.
